Korah

Free study tools, built by students

Korah CODE internship · Fall 2026 cohort

Ship real code this fall.

Six weeks of learning **agentic programming**: using AI to write code you actually understand, not slop. Then you put it to work on a site students use every day.

6 weeks	4–8 interns	All grades
Lessons and projects	Small cohort	Any high schooler

- Build features that ship to the live Korah site.
- Design and launch a capstone project of your own.
- Get mentored directly, in HTML, CSS and JavaScript.
